

**MATH 2450-003**  
**Calculus for Engineering Technology**  
Summer I 2008  
Professor El-Bialy  
melbially@math.utoledo.edu  
May 11, 2008

**Getting Started**

1. **How to register on CourseCompass web page:**
  - (a) Course ID. el-bially12167 :
  - (b) <http://www.coursecompass.com/>
  - (c) → [Get Started](#) → [Students](#) → [Register and Enroll in a Course](#)
  - (d) Follow the instructions.
2. **Necessary software:** Click on [Installation Wizard](#) in order to download the necessary software for this course.
3. Click on [Technical Calculus I: Professor El-Bialy](#). On the left you will see several links with self-explanatory names.
4. It is natural to start with → [First Things First](#).
5. → [Syllabus](#): Read the course syllabus carefully. There you will find information about
  - Prerequisites.
  - Tests and quizzes, ... etcetera.
  - Due dates for tests and quizzes, ... etcetera.
  - Grading policy.
  - ... etcetera.
6. **Internet facilities needed.**
  - The system we are using is compatible only with "Internet Explorer" browser.
  - E-mail account that accepts and sends attached documents.
  - There are a variety of sites that offer free accounts.
  - Set up a separate account just for this course.
  - Once you have your account, make a special folder to store all course correspondence and files.
  - Access to the Internet with a browser that will support the web-based textbook (suggest Internet Explorer).
7. **Announcements:** You need to check the announcements that are posted on **CourseCompass** on a daily basis.
